

## + eToken Web Sign-On (WSO)

Many of today's eToken users are responsible for accessing and using a variety of web - based accounts related to their organizations. From commercial online banking accounts to business intelligence sites - the number of online passwords can be hard to remember and manage - and worse, can be risky for your business. Too many passwords to remember often results in using the same password for multiple sites, or using easy passwords - both can mean an easy way in for hackers and trouble for your company.

Enter eToken Web Sign On (WSO) - a password management solution that allows users to securely store and manage all their web logon credentials. With one single eToken password eToken WSO will help prevent:

- Users write their passwords on paper or sticky notes pasted to their computer screens
- Employees using the same password for multiple sites
- Time and effort spent retrieving forgotten passwords managing passwords across your organization?

### eToken WSO Streamlines Web Access

eToken WSO enables convenient, secure and portable storage of all user web logon and access credentials. They can insert any password, as long and complex as they wish, and never worry about remembering it. Login to commercial online accounts is fast, secure and doesn't expose your business to risk.

In fact all necessary logon information, including passwords, PIN numbers, account numbers, credit card details, telephone numbers, and more, can be stored in the highly secure eToken smart-card-based devices. Users need only authenticate with their eToken device and password for instant access to their online accounts. eToken WSO automatically recognizes a web logon page, fills the needed information and even optionally submits the form for the user.

### eToken WSO Benefits Features

- Provides easy and secure access to multiple web accounts using a single eToken device
- Gives users full mobility, taking their passwords with them wherever they go
- Manages multiple logon credentials
- Protects sensitive data and information
- Supports multiple user platforms
- Easily extended to provide a variety of additional security services

*And WSO is only the beginning. Enterprises can enable employees to enjoy the benefits of eToken WSO, while utilizing additional eToken solutions on a larger scope. eToken SSO, which includes Single Sign-On, Web Sign-On and Network Logon, enables organizations not only to provide employees with easy and secure web access, but also to store all their network and desktop application credentials on-board their personal secure token, enhancing even more enterprise security and productivity.*

## eToken WSO Save and Automatic Fill-In

eToken WSO provides your users easy access to all their web accounts by conveniently saving logon credentials and submitting them automatically.

Secure and immediate access  
to all online accounts

### WSO Features
